Terrain and Maps

The competition terrain offers very detailed contours with many depressions and ridges between them. Runnability and visibility vary from very good to poor and there are almost no open areas on the terrain and only a handful of marshes.

Tartu Ski Marathon track is passing through the area and there are also some smaller paths and tracks. WOC 2017 middle distance and relay were held in the same terrain.

All maps are corrected in 2018–2019, scale 1 : 10 000, contour interval 2,5 m.
